

Abhinil Agarwal

Senior Web3 & Solidity Engineer | DevRel & Evangelist

Jaipur | Bangalore | Himachal

Mob: +91-8107599599 | Email: abhijaipur2011@gmail.com

GitHub: t-phoenix | Website: abhinil.in | LinkedIn: abhinil-agarwal

Target roles: Web3 Evangelist / DevRel | Senior Solidity / Smart Contract Engineer

Summary

Web3 full-stack and smart contract engineer with 4+ years of experience building DeFi, NFT, DAO, and on-chain credit products across EVM and Aptos. Successfully bridged over 1B USD in private credit loans on-chain and shipped scalable dApps from ideation to launch (web and mobile). Experienced in DevRel: created tutorials, starter kits, and workshops for Celo and ecosystem events, helping teams adopt Web3 faster.

Skills

Smart Contracts & Protocols: Solidity, EVM, Foundry, Hardhat, OpenZeppelin, Ethers.js, Web3.js, ERC-20/721/1155, DEX/AMM design (Balancer/Uniswap-style), DAO governance, on-chain credit, Aptos Move.

Infrastructure & Tooling: Contract architecture & reviews, testing & invariant tests, gas optimisation, upgrade patterns, multisigs, CI for contracts, event indexing/analytics.

Frontend & Mobile: React, Next.js, React Native (JS), Flutter (Dart), Android (Java), WalletConnect, Valora, Firebase, Google Play deployment, UX for DeFi/DAO/mobile wallets.

DevRel & Content: Technical writing (Medium, HackerNoon), tutorials, starter templates, hackathon mentoring, workshops, community events, product & developer documentation.

Other: GCP (Firebase/Firestore, AutoML, Dialogflow), Node.js, JavaScript/TypeScript, C++, Java, Python, WordPress.

Experience

Pact Labs / Cosx.ai

Mar 2025 – Present

Senior Web3 & Full-Stack Engineer

- Designed and deployed smart contracts on EVM and Aptos powering over 1.5B+ USD in on-chain lending and private credit products.
- Built and maintained React Native mobile apps for real-time blockchain interactions, including wallet flows and credit product UX.
- Worked with CTO and PMs to translate off-chain credit structures into robust on-chain architectures, and authored internal documentation for faster engineer onboarding.

Equistart Labs

Jun 2022 – Mar 2025

Web3 Full-Stack Engineer

- Developed and scaled dApps including DAO tooling, a Balancer V4 / Uniswap V3-based DEX, and a decentralized crypto index product.
- Implemented pool logic, fee mechanics, and rebalancing automation in Solidity and Foundry; integrated subgraph/analytics-style data for dashboards.
- Shipped production React/React Native dApps for DeFi and DAO users, integrating WalletConnect and mobile-friendly Web3 flows.

Celo Foundation

Mar 2022 – May 2022

Developer Relations Engineer

- Created tutorials, blogs, and starter templates to help developers build mobile-first Celo dApps using React Native, Web3.js, Valora, and WalletConnect.
- Engineered a React Native framework to quickstart Web3 projects that hackathon teams and early-stage projects used as a base.
- Supported hackathon teams with architecture guidance and debugging, contributing to multiple prize-winning submissions on Celo.

ETG India

Jan 2021 – Jun 2021

Full-Stack dApp & Mobile Engineer

- Built an insurtech mobile application integrating image recognition with GCP services.
- Managed backend on Firebase and launched the app on the Google Play Store.

Education

IIIT-Bangalore

2016 – 2021

Integrated M.Tech in Computer Science & Engineering

Aravali Public School, Sikar

2013 – 2015

Higher Secondary

Ryan International School, Jaipur

2013

Secondary School

Selected Highlights

Balancer Hookathon (DoraHacks)

Sept – Oct 2024

Volatility-based Fee Hook for Balancer V3

Won \$2000 in prizes for developing a Balancer V3 volatility-based fee hook for EVM smart contracts.

Build With Celo Hackathon (Hackerearth)

Sept – Nov 2022

Equistart – The DAO Suite

Won an aggregate of \$2500 in prizes for building a full-stack mobile DAO suite dApp on Celo.

Harmony Hackathon (Gitcoin)

Aug – Sept 2021

On-Chain Wallet Frontend

Won 1st prize (\$20,000) for a mobile wallet UI/UX for on-chain interactions, built with React Native.

Green NFT Hackathon (Gitcoin)

Mar – May 2021

NFT Sustainability Research

Won \$1700 worth of crypto for researching NFT platforms and blockchains to evaluate environmental impact.

Hobbies

Traveller, trekking, musician (guitar), culture, flow arts, sports, sketching, painting.
